

INTRODUCING NEW! SUPER PAINTGUARD™

New Super PaintGuard™ collection media from the Cumulus Fibres line provides superior paint holding capacity while limiting run off when compared to the leading premium collection media. Super PaintGuard™ rivals the efficiency seen in higher priced collection media.

Our Patent dual-stage construction allows the more porous first layer to collect the overspray; meanwhile, the engineered high efficiency of the final layer holds more paint in the filter preventing it from entering a down stream air system.

The inline one-piece design provides higher strength in fully loaded capacity. Replace your higher priced premium collection media today with Cumulus Fibres newly designed Super PaintGuard.™
